

ONE-DAY WORKSHOP ON

Lean Project Management Best Practices

26th MAY 2017, BENGALURU

constask

To establish a practical framework to plan, monitor and control construction projects

In construction projects majority of activities gets completed during the fag end of projects, irrespective of the time schedule prepared in the initial phase. This causes quality issues, stress for professionals and profit loss even if the project is handed over on time.

A simple, structured and systematic way of planning the project using Lean Construction and Project Management best practices by involving every stakeholder at right time will ensure proper making ready of activities, better controlling of works & timely completion of project.

Benefits from Workshop

The Workshop will enable the participants to establish a practical framework in projects for better planning, monitoring and controlling the construction projects. The multi level planning approach with commitment based monitoring and analytical controlling will facilitate team to foresee uncertainties and manage constraints continuously.

Ways to incorporate Lean construction fundamentals, like, collaboration, elimination of inefficiencies, ensuring value and improving flow, in Project Management, will be discussed in this workshop.

About the Company & Faculty

Constask Management Solutions established in 2015 aims at improving the performance of construction projects and increase project team productivity through Management Consulting and Technology Solutions. 850+ construction professionals have benefitted from 28+ workshops conducted on various management concepts from Lean Construction & Project management. The Lean Project Management best practices are implemented in 6+ projects and recent implementation in a project of leading developer resulted 15% increase in their monthly performance compared to previous months with 5 days engagement spread over two months.

Er. Tony Jacob, PMP, MIE, PMI-PBA is a Civil Engineer & PG Diploma in Construction Management having Project Management Professional (PMP) certification since 2007 and PMI-PBA from 2015. He is an active volunteer in many professional bodies promoting Project Management & Lean Construction. He is currently serving as ILCE Bengaluru Hub leader and served as PMI Pearl City Chapter Board member for the period 2014-2016. He also contributed to the development of Project Management Body of Knowledge (PMBok by Project Management Institute) and its construction extension.

Tony has 15 years of hands on experience in construction industry working in India and abroad. Apart from construction project execution he has experience in Management Consulting, business process improvements, document management system implementation, ERP development, SAP implementation and Mobile application conceptualization etc. Tony implemented Lean Project management best practices in 10+ projects and they were well received by execution team, as well as appreciated by management team for its effectiveness and benefit realizations.
